CHECKER  
Taxi

Descripción del Servicio/Boda. Punto de recogida,  
recorrido, iglesia,...

When we speak of the Checker Taxi, we are definitely looking at the best known taxi in the United States. It was the only car produced specifically as a taxi in the United States, based on the design of a rural four-door van for six passengers.

In contrast to other companies (Ford, Chevrolet, Plymouth and Studebaker), which adapted their sedans to be transformed into taxis, the Checker has been converted into a private car for passengers.

The Checker is fully designed to withstand the tough service taxis undergo in city traffic. This is the key to the unique design of the Checker and the reason for its unique handling characteristics: its wide doors and high seating provide great comfort to its passengers, resulting in a very practical car to get in and out of. Practically inexhaustible, it can clock up a huge mileage without needing repairs, making it extremely economical. Road surface vibration has been reduced to the absolute minimum, owing to its solid X-shaped chassis.

To travel in this legendary vehicle is to experience

---

exclusivity, quality, history and style. With **Grup Limousines** you can ride in one of the very few Checker Taxis existing in the whole of Europe.
